SUMMARY

Certified and highly motivated Cloud Computing and Networking professional with hands-on experience in designing and deploying scalable cloud architectures. Skilled in leveraging tools such as Docker, Kubernetes, Terraform, and CI/CD pipelines to automate workflows, optimize system performance, and reduce deployment times. Proficient in AWS services, Linux administration, and networking fundamentals. Demonstrated ability to troubleshoot, deploy, and secure network infrastructures. Eager to contribute to Cloud, Linux, and DevOps projects through innovative and efficient solutions.

PROFESSIONAL EXPERIENCE

Feb 2025

Pune, Maharashtra

Network Engineer — SP IT Solutions LLP, Pune

- Responsible for network infrastructure support, monitoring, and troubleshooting for enterprise systems.
- Provided service assurance, fault analysis, and proactive network maintenance.
- Collaborated with the IT team to enhance system reliability and apply network security best practices.

COURSES AND COMPLETION

Amazon Web Services (AWS)

SevenMentor & Training Pvt Ltd., Pune (2024)

Linux (RHEL 9)

SevenMentor & Training Pvt Ltd., Pune (2024)

Cisco Certified Network Associate (CCNA)

SevenMentor & Training Pvt Ltd., Pune (2024)

DevOps

SevenMentor & Training Pvt Ltd., Pune (2024)

PROJECTS

Automated Website CI/CD Pipeline

Tools: GitHub, Jenkins, Docker, Ansible, AWS

Developed and deployed an automated Continuous Integration and Continuous Deployment (CI/CD) pipeline for a website project using Jenkins, Docker, and AWS services. Configured AWS EC2 instances to create the required infrastructure and integrated automated code deployment into the pipeline. This project demonstrated the effectiveness of automation and streamlined processes for quicker product releases. (Group Project)

IaC Deployment for AWS Infrastructure

Tools: AWS CloudFormation

Designed and implemented an Infrastructure as Code (IaC) solution using AWS CloudFormation to automate the deployment and management of cloud resources. Provisioned critical components such as VPCs, EC2 instances, MySQL servers, and IAM configurations, significantly reducing manual configuration and setup time. This approach improved consistency and repeatability, enabling the rapid provisioning of cloud resources and minimizing human error.

PERSONAL DEVELOPMENT PROJECTS

Resilient and Scalable Web Application

Tools: VPC, EFS, ALB, Auto Scaling

Engineered a highly available and scalable architecture for a web application hosted on AWS. Leveraged AWS services such as VPC for networking, EFS for shared storage, and ALB to ensure seamless routing. Implemented Auto Scaling to handle varying workloads, ensuring high availability and fault tolerance across multiple Availability Zones. This infrastructure was able to sustain increased traffic while maintaining optimal performance, ensuring business continuity during peak loads.

Containerized Application Deployment on AWS ECS

Tools: Docker, Kubernetes, AWS ECS

Built and deployed containerized applications using Docker, managing the deployment and scaling of containers with Kubernetes. Configured AWS ECS to orchestrate container workloads, optimizing resource utilization and ensuring high availability across multiple environments. By using container orchestration, the deployment process was automated, improving speed, reliability, and scalability.

Cloud Performance Monitoring and Alert Automation

Tools: Prometheus, Grafana, AWS CloudWatch, Alertmanager

Developed an systematized system for monitoring application performance and infrastructure health. Integrated Prometheus for collecting system and application metrics, Grafana for visualizing metrics, and Alertmanager for sending notifications in case of threshold breaches. Configured AWS CloudWatch for server and application logs to create a comprehensive monitoring and alerting system. This project ensured the quick detection of system failures and performance issues, improving operational efficiency and reliability.

EDUCATION

2024 Kolhapur, India	Sanjay Ghodawat University <i>B.Tech</i>
2021 Shirol, India	Shree Datta Polytechnic College <i>Diploma</i>
2018 Kurundwad, India	S. P. Highschool <i>SSC</i>

SKILL SET

Cloud Computing (AWS)

VPC, EC2, EBS, EFS, SNS, IAM, S3, ELB, ASG, RDS, ECS, Containers, Lambda

Networking (CCNA)

Protocols, OSI Model, IP Address, IPv4, Port Number, Subnetting, Firewall, VPNs, Network Address Translation

Linux Administration (RHEL 9)

User & Group Management, SUDO, Partitions & File Systems, Shell Scripting, Job Automation, managing SELinux, RegEx, SSH, Memory Management, Software Management, Remote File Transfer, Backup & Restore, Configure Servers (DNS, NFS, etc.)

DevOps

Git, Jenkins, Docker, Kubernetes, Terraform, Prometheus, Ansible

TECHNICAL COMPETENCIES

Operating Systems

Windows, Unix/LINUX (Ubuntu, Red Hat, CentOS 7)

Virtualization

Workstation

Programming Languages

Shell Script, PowerShell, Terraform (HCL), Python

CI/CD Deployment

Git, Jenkins, Code Pipeline

Cloud Computing Tools

Docker, Kubernetes, Docker Swarm, AWS ECS, AWS Lambda

Databases

RDS, MS SQL

Automation/Configuration Script

Ansible, Terraform

Monitoring Tool

CloudWatch, Prometheus

PERSONALITY AND SOFT SKILLS

- Effective Communicator
- Adaptable and Quick Learner
- Problem-Solving Mindset
- Committed to Continuous Learning
- Troubleshooting and Teamwork

LANGUAGES

- English
- Marathi
- Hindi
